Today, more than just Health Care and Educational Facilities turn to **BAC-ATTACK®** to get the stink out!

The history of **BAC-ATTACK®**

BAC-ATTACK® was developed in the late 1980's specifically to solve one problem for one industry. The **Eradication** and **Control** of problem urine odor within the Health Care Industry. For years hospitals and nursing homes fought this very impressionable problem with everything from bleach, disinfectants, to deodorants. These products either did not work or made the stinky problem worse.

Thus, RHOMAR developed **BAC-ATTACK®**, to provide the **Health Care Industry** with a solution to fight the common problem of **URINE ODOR!** Whether it was incontinent patients or residents, Alzheimer's units, or even urinalysis testing labs, all were plagued by lingering, stinky urine odor left behind after a thorough cleaning. Simply by adding **BAC-ATTACK®** after their regular cleaning programs, facilities immediately realized its remarkable power to eradicate and control urine odor.

Then, as luck would have it, a hospital administrator was attending a national trade show with his wife, a principal of an elementary school. When he stopped to inquire about our **BAC-ATTACK®** she mentioned her facility, particularly the boy's restrooms, also had the same problem with urine odor. Years of continued use and contamination had left her facility with a big, stinky problem. She purchased **BAC-ATTACK®** and within one week had reported to us that the urine odor they had fought for years was gone. Simply by adding **BAC-ATTACK®** after their normal cleaning routine, they solved a problem they had lived with for years.

From this one customer, **BAC-ATTACK®** became the **product of choice** for urine odor control in school systems nationwide.

Today, **BAC-ATTACK®** is used by a **very diverse** group of professionals charged with giving their facilities that picture perfect image. No matter what type of facility you run, **YOU CAN TRUST** that **BAC-ATTACK®** will give you the results you deserve!

**CONTROL THE
STINK OF URINE
ODOR TOMORROW!**

You need BAC-ATTACK®!

Parks, National Monuments, and Historical Places

Stinky urine odor problems come from older restrooms seeing frequent use.

You need BAC-ATTACK®!

Straight talk about **BAC-ATTACK®** and urine odor

1. I keep my restroom clean, so why do I have a urine odor problem?

Don't worry, it's not your fault. Unlike **BAC-ATTACK®**, general purpose cleaners, enzymes, air fresheners and deodorants are not designed to seek out and destroy the cause of problem urine odors, decomposing urine bacteria. At best, these solutions are a stop gap measure, usually they simply end up masking or mingling with the urine odor.

2. Can **BAC-ATTACK®** be used in areas other than restrooms?

Yes! Besides getting the stink out of restrooms, **BAC-ATTACK®** also has a proven track record on the following surfaces: concrete, tile, porcelain, carpet and padding, bed covers and linens, even seating surfaces made of plastic, cloth, vinyl and leather.

3. What is the best way to apply **BAC-ATTACK®** to my restroom?

You have a choice! For smaller restrooms, **BAC-ATTACK®** comes in handy quart size spray bottles. If you have large restrooms or gang urinals, you can apply **BAC-ATTACK®** with the **Rapid Application System**. This rugged 3-gallon applicator is light-weight, easy to fill and specifically designed to deliver a proper, no-waste application of **BAC-ATTACK®**.

4. How does **BAC-ATTACK®** work?

BAC-ATTACK® is designed and blended to do one thing, biologically destroy urine odor at its source. That source is **decomposing urine bacteria**. Urine bacteria is able to migrate into the microscopic pores of tile, grout, and under plumbing fixtures where it lies and begins to decompose. Within a few hours, the bacteria releases a gaseous odor that we recognize as "**Urine odor**". **BAC-ATTACK®** is able to follow urine into the surface pores where it encapsulates, then biologically destroys urine odor bacteria. Within a few days you will notice 100% urine odor control. **Guaranteed.**

5. How often should I apply **BAC-ATTACK®**?

The amount of urine contamination your specific restroom has, will be the deciding factor upon how often you should apply **BAC-ATTACK®**. Follow these simple guidelines: restrooms with a faint odor of urine will only need **BAC-ATTACK®** applied one to two times a week. In extreme cases, a restroom may need daily treatment to gain and maintain control.

6. What kind of results can I expect from **BAC-ATTACK®**?

Total eradication and control of problem urine odor in your facility. Once you use **BAC-ATTACK®**, you simply will not be without it. Don't just take our word for it!
