

SNAKE-IT™

The Ultimate Sewer Opener

DESCRIPTION: SNAKE-IT™ was developed specifically for municipal and industrial sewer collection professionals to keep sewer lines open without the trouble or expense of Jetting.

USES: SNAKE-IT™ can be used to unclog slow moving or completely clogged sewer lines or used to pro-actively prevent troublesome sewer line hot spots from clogging. The SNAKE-IT™ granular formula is remarkable at melting away fats, oils and greases (FOG) while the aluminum needles literally eat and cut through roots and fibrous materials that act as the catalyst for clogs.

APPLICATION: For plugged lines, simply pour SNAKE-IT™ from the convenient plastic pail into the manhole or drain opening nearest the clog. Usually pour approximately ½ to 1 pail per clog and repeat if necessary. Must be added to wet lines or flushed with water for effective results.

For preventive maintenance to your lines, just add 1 to 2 lbs on regular intervals to keep your lines from clogging. Must be added to running water for effective results.

- **ALUMINUM NEEDLES** - Rips through roots & fibrous clogs!
- **SUPER HOT** - Granular formula!
- **MELTS AWAY FOG** - Fats, Oils and Grease!
- **PREVENT CLOGS** - With regular scheduled dosing!
- **SIMPLY PUT, IT WORKS!!**
