

BRIDGE-CON

Concrete & Bridge Component Encapsulant

Protects bridges from corrosion damage caused by salt and liquid deicers.

PROBLEM

DETERIORATING BACK AND WING WALLS

RUSTING BEAM ENDS

CORRODING DECK DRAINS

SOLUTION

BRIDGE-CON
CONCRETE & BRIDGE COMPONENT
ENCAPSULANT

BENEFITS

-  **CORROSION PROTECTION FROM SALT** - meets or exceeds SPEC D-6083-97 and passes the humidity cabinet salt spray test at over 1000 hours.
-  **FLEXIBLE ADHESION & STRENGTH** - tenaciously adheres to concrete and metal components. Over 500% elastomeric, will not chip or crack with bridge movement.
-  **COLOR COORDINATED FOR AESTHETICS** - goes on in an aesthetically pleasing concrete grey, blending in with your existing concrete.
-  **UV & MOLD PROTECTION** - so it will not fade when exposed to direct sunlight, plus it contains a mildewstat that prevents mold and algae growth.
-  **SAFE FOR THE ENVIRONMENT** - as it contains absolutely no petroleum or hazardous solvents which can cause soil contamination, making it perfect for use around waterways.

More about BRIDGE-CON

BRIDGE-CON was developed to protect concrete and metal bridge components from the devastating effects of salt and liquid deicers. These corrosive deicers are applied to the bridge deck to eliminate dangerous conditions, but they migrate through expansion joints and deck drains attacking beam-ends, piers, caps, abutments and wing walls.

FAQ about BRIDGE-CON

Do I need to clean the bridge components and concrete before applying BRIDGE-CON?

To help **BRIDGE-CON** adhere properly to the surface, we recommend you clean your bridge components and concrete with NEUTRO-WASH Salt and Chloride Neutralizer.

How do I apply BRIDGE-CON to my bridge?

BRIDGE-CON can be rolled, brushed, or sprayed on your bridge surfaces.

**USE BRIDGE-CON
TODAY!**
