NEUTRO-WASH

Salt and Chloride Neutralizer

Easily removes the corrosive salt residue from your deicing equipment and fleet.

RHOMAR

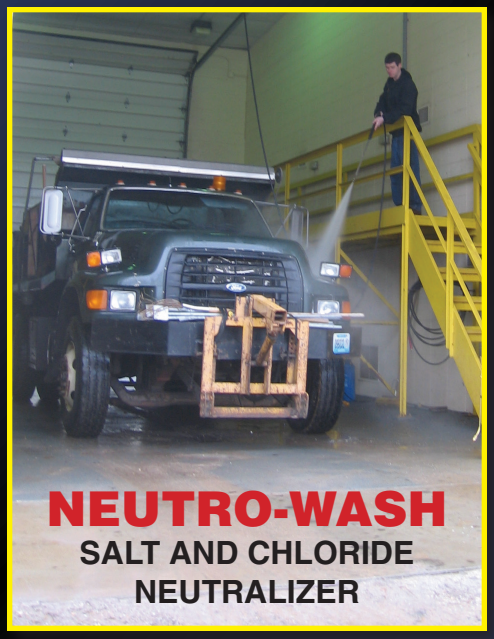
PROBLEM

LIQUID DEICERS

GRANULAR SALT

SUMMER STORAGE

SOLUTION



NEUTRO-WASH
SALT AND CHLORIDE NEUTRALIZER

IT'S NOT CLEAN UNTIL IT'S NEUTRO-WASH CLEAN!

USE NEUTRO-WASH TODAY!

BENEFITS

- ☑ **PREVENTS SALT FROM ATTACKING YOUR EQUIPMENT AND FLEET** – by removing the white salt residue from your frames, wiring harnesses, radiators, paint jobs and more!
- ☑ **EXTREMELY ECONOMICAL** – dilutes 1 to 8 with water!
- ☑ **SAVES BUDGET DOLLARS** – by extending the operational life cycle of your existing equipment and fleet!
- ☑ **COMPLETELY CLEANS YOUR VEHICLES AND EQUIPMENT** – no more washing equipment only to see a **white salt residue** reappearing once the equipment has dried!
- ☑ **AWARDED GSA CONTRACT GS-07F-0013T** – for purchasing by federal agencies worldwide!

How to apply NEUTRO-WASH

25 Gallon Sprayer

Pressure Washer

Wash Bay Systems

The story behind NEUTRO-WASH

Improvements in deicing technology have pushed the industry toward spraying liquid chlorides for anti-icing, deicing and prewetting of salt and sand. The results are good, but these aggressive chemicals create **unsightly rust spots, faded paint, holes in oil pans, rusted frames and undercarriage components.** This **corrosion** leads to expensive unscheduled maintenance, costly down time and **greatly reduces the trade-in** and **resale value** of your vehicles and equipment.

Close-up of salt attached to a vehicle after a winter storm.

We know maintenance departments regularly wash their vehicles and equipment to remove the salt, but normal washing alone, just doesn't cut it. A magnetized and extremely corrosive **"white salt residue"** always reappears on your vehicles and equipment after they have dried. This **"white salt residue"** is the fuel for the rusting process. **Something had to be done.**

Thus, **RHOMAR** developed powerful **NEUTRO-WASH**, a quick and easy solution that neutralizes, then breaks apart this corrosive **"white salt residue,"** allowing you to simply rinse it away. Now you can give your vehicles and equipment a fighting chance by adding **NEUTRO-WASH** to your wash bays and maintenance programs, **stopping rust before it starts!**

FAQ about NEUTRO-WASH

Why should I add NEUTRO-WASH to my cleanup routine?

Reason 1. Because ordinary wash bay soaps cannot remove the corrosive **"white salt residue"** from your vehicles and equipment.

Reason 2. Because it is less expensive to remove the **"white salt residue"** and prevent rust before it starts than to battle it later with costly sandblasting and repainting.

Reason 3. Because it can **save you thousands of budget dollars** in repairs or replacement of vehicles or equipment lost prematurely to rust and corrosion.

Reason 4. Because rust and corrosion damage costs you thousands of dollars in lower resale and trade-in values to your cars, trucks and equipment.

When should NEUTRO-WASH be applied?

1. Just add **NEUTRO-WASH** to your normal cleanup routine to protect your vehicles and equipment all winter long.
2. In the springtime, one final application of **NEUTRO-WASH** should be applied to all equipment, so the corrosive **"white salt residue"** doesn't remain, eating away at them all summer long.

How do I use NEUTRO-WASH?

Step 1. Dilute **NEUTRO-WASH** 1 to 8 with cold water.

Step 2. Apply the **NEUTRO-WASH** through your wash bay pressure washer, mobile pressure washer or with **RHOMAR's 25-Gallon Battery Powered Sprayer.**

Step 3. Let the **NEUTRO-WASH** penetrate for approximately 2 to 3 minutes.

Step 4. Rinse away the **NEUTRO-WASH** and the **"white salt residue"** with fresh water.
