STAND-UP™

Freeze Resistant Liquid De-Icer
& New Automated Spray System

Melts quicker, works longer and is safer than
salt or chloride pellets, **GUARANTEED!**

Using **STAND-UP™**
on dangerous ice.

Using **STAND-UP™**
on slippery snow pack.

PRE-TREATING before an ice storm:

- ➔ Apply **STAND-UP™** with a fan spray to critical areas 4 to 6 hours before an ice storm.
- ➔ Apply **STAND-UP™** liberally, completely wetting areas of concern, such as steps, ramps & walkways!
- ➔ **STAND-UP™** reduces the ability of ice to bond to concrete or asphalt, saving you the frustration of chipping, hammering or scraping!
- ➔ **STAND-UP™** stops the formation of **dangerous black ice!**

POST-TREATING after an ice storm:

- ➔ Apply **STAND-UP™** with a jet stream to penetrate and get underneath the ice, so it can break the bond for easy removal.
- ➔ The jet stream cuts valleys in the ice, and allows **STAND-UP™** to get beneath it. You'll actually hear the ice begin to snap and pop as the bond breaks!
- ➔ **STAND-UP™** wipes out **dangerous black ice** and heavy frost in an instant!

PRE-TREATING before a snow storm:

- ➔ Apply **STAND-UP™** with a fan spray to critical areas 4 to 6 hours before a snow storm.
- ➔ Apply **STAND-UP™** liberally, completely wetting areas of concern, such as steps, ramps & walkways!
- ➔ **STAND-UP™** reduces the ability of high moisture content snow to bond to concrete or asphalt!
- ➔ **STAND-UP™** will greatly reduce the labor needed to completely clear steps, ramps and walkways!

POST-TREATING after a snow storm:

- ➔ Always plow or shovel excess snow away before applying **STAND-UP™!**
- ➔ Apply **STAND-UP™** with a jet stream to the remaining snow pack!
- ➔ **STAND-UP™** will melt away the slippery snow pack and prevent it from freezing and becoming like ice!
- ➔ **STAND-UP™** is remarkable at preventing refreezing in those dangerous divots in decorative concrete and pavers!

You'll love **STAND-UP™!**

STAND-UP™ addresses the slippery conditions found on loading docks.

You'll love **STAND-UP™!**

STAND-UP™ is great at breaking up ice jams in your gutters and roof drains that contribute to roof leaks.

You'll love **STAND-UP™!**

These facilities **STAND-UP™** to snow & ice. Does your facility?

Hospitals & Nursing Homes

STAND-UP™ is a necessary tool for hospitals with a zero-tolerance snow policy. **STAND-UP™** is remarkable on **mission critical** areas like emergency room entrances, helipads, visitor and staff entrances.

Schools & Colleges

STAND-UP™ keeps students, faculty, staff and visitors **safe from slips and falls** in bus loading areas, student and staff parking lots, dorms, and at sporting events. **STAND-UP™** allows you to stay ahead of the storm!

Industrial Plants & Warehouses

STAND-UP™ gives you ice and snow control that will keep production and logistics running around the clock. 2nd and 3rd shifts battle the hazards of refreezing slush and snow, especially around employee entrances and loading docks. **STAND-UP™** is also excellent at melting **frozen gutters & roof drains** on flat roofs that cause leaks!

Churches & Non-Profits

STAND-UP™ allows busy churches to keep the doors open for multiple services and activities throughout the day and night. **STAND-UP™** helps **lower your liability** by protecting your members, visitors and staff from dangerous slips and falls!

"When it comes to fighting snow and ice, STAND-UP™ is simply a better mousetrap!"
