

# PUBLIC "WORKS" APPLICATORS

Heavy Duty Metal or Rugged "Big Mouth" Polyethylene

PROVEN  
TOUGH!!

## THE NEW INDUSTRY STANDARD FOR STATE DOT'S, DPW'S AND CONTRACTORS!

If you buy or stock sprayers for your personnel to spray liquids, such as herbicides, degreasers, citrus solvents, tar removers, tack oils, form oils, release agents or any other cleaners or coatings, then you must have experienced some of these aggravating sprayer problems.

Need to change flow rates?  
Pick up extra  
"pop-in" nozzle tips!

- **JOBS INTERRUPTED** - by complaints from the field about sprayers not working?
- **DETERIORATED GASKETS AND O'RINGS** - caused by aggressive liquids?
- **HIGH COST** - of constantly replacing those inexpensive ordinary or "garden type" sprayers?
- **NEVER GET THE RIGHT FLOW RATE** - through those flimsy plastic adjustable nozzles?
- **INVENTORY NIGHTMARE** - constantly ordering or running to the store for new sprayers?

Thus, RHOMAR developed the **Public "Works" Applicators** to eliminate these aggravating problems caused by **ordinary** or **"garden type"** sprayers. Start using the **Public "Works" Applicators** in your operation today and enjoy these benefits:

- ✓ **BUILT TOUGH** - developed specifically for State DOT's, DPW's and contractors!
- ✓ **PARTS** - all parts are available with a simple call! Why replace them, when you can repair them!
- ✓ **HI-TEC GASKETS AND O'RINGS** - will not harden or shrink like those made of rubber!
- ✓ **EASY CHANGE "POP-IN" NOZZLE TIPS** - are available for those jobs when you need to change the flow rate!
- ✓ **SIMPLY PUT** - these applicators get the job done!

RHOMAR's **Public "Works" Applicators** are the industry standard for work forces throughout North America!

# FREQUENTLY ASKED QUESTIONS ABOUT RHOMAR'S PUBLIC "WORKS" APPLICATORS

The Heavy Duty Metal Applicator will tackle any job!

## Why do you have three different types of Public "Works" Applicators?

The reason is simple, it's impossible to design one applicator that would meet the diverse needs of all our Public Works and Contractor customers. So we designed three applicators to meet everyone needs.

1. **Heavy Duty Metal** - for when you need strength and durability in an applicator.
2. **Rugged "Big Mouth" Polyethylene** - for when you are mobile and need a lighter solution with an easy fill tank.
3. **Rugged "Big Mouth" for Acid** - if you are required to spray acids, this is the one for you.

## How do Public "Works" Applicators solve common sprayer problems?

**PROBLEM:** Sprayers not spraying. → **SOLUTION:** Enlarged openings, hoses and nozzles that prevent your applicator from clogging!

**PROBLEM:** Sprayers not pumping. → **SOLUTION:** Hi-Tec gaskets and o'rings that do not shrink or crack keeping your applicator pressurized!

**PROBLEM:** Broken plunger clips. → **SOLUTION:** Lug nut design on the Public "Works" Applicator eliminates the need for plunger clips!

**PROBLEM:** It's impossible to figure the flow rate with the "adjustable" nozzle tip of most sprayers. → **SOLUTION:** Extra "pop-in" nozzle tips make it a snap to get a different flow rate or to go from a mist to a spray!

**PROBLEM:** Short life span of ordinary sprayers. → **SOLUTION:** Parts availability keep RHOMAR's Public "Works" Applicators working long after "ordinary" sprayers are in the trash!

The "Big Mouth" Applicator gives you room to fill without putting your plunger in the dirt!

## Who uses our Public "Works" Applicators?

Public Works Departments, State DOT's, County Highway Departments, City Street Departments, Sewer/Water/Wastewater Departments, National Parks, Parks and Recreation Departments, Bridge Departments, Solid Waste Departments, Building and Grounds Departments, Shops and Private Contractors.

Hi!

To place an order for your Public "Works" Applicators

The "Acid" Applicator is the ultimate for spraying corrosives or acids. The same benefits as "Big Mouth" but with acid resistant wand!
