

RHOMA-SWEET™

Grape Sewer Sweetener

Application Tip Sheet

USAGES

Use RHOMA-SWEET™ to reduce odors in Municipal lagoons, sewer mains, aerators and all areas of wastewater treatment plants. RHOMA-SWEET™ can also be used for industrial waste haulers, processing and rendering plants that deal with eradicating tough odors caused by the stench of decomposing and fermenting of any animal or organic waste.

APPLICATION

Use RHOMA-SWEET™ full strength or by the drip method in wastewater lagoon systems or at the wastewater treatment plant clarifier's, trickling filters or holding tanks that emit odors. Always make sure to cover the affected area by wetting it thoroughly. May be diluted with water for greater economy if the odors to be covered are not that intense.

RHOMA-SWEET™ can also be applied with Rhomar's 3-gallon hand held pump up sprayer to smaller area's such as:

Sludge hauling equipment

Trash dumpsters

Sewer over-flow area's

Basically anywhere obnoxious odors occur!
